

July 1st, 2025

REMOVALL Carbon has secured corporate debt financing from four leading French banks to accelerate its growth.

REMOVALL Carbon is a **developer** and **investor** in **high-integrity, high-impact nature-based** projects that **remove CO₂ from the atmosphere**.

To date, REMOVALL Carbon has invested in or supported more than **150 projects** focused on **reforestation, mangrove restoration, agroforestry**, the **distribution of improved cookstoves**, and **access to clean water**. For the projects directly developed and financed by REMOVALL Carbon, **over 12 million tonnes of CO₂ will be sequestered** over their lifetime, and **100 million trees** will be planted.

Following the creation in April 2025 of a joint investment platform with Sumitomo Corporation to co-finance its projects, REMOVALL Carbon is now establishing a **financing club** with **four French banks** to strengthen its long-term funding capacity at the corporate level.

Société Générale, Caisse d'Épargne Normandie (BPCE Group), **LCL**, and **Crédit Agricole Alpes Provence** (Crédit Agricole Group) are now supporting REMOVALL Carbon through this **corporate financing facility**.

Jérôme Beilin, CEO and Co-Founder of REMOVALL Carbon, stated:

"We are honored to strengthen our banking relationships and to launch this dedicated corporate financing to support REMOVALL Carbon's growth in climate and community impact projects. We reaffirm our ambition to finance large-scale, high-integrity, certified carbon sequestration projects. This collaboration will reinforce our ties with major French banking institutions and help us improve the competitiveness of our average cost of capital - a key factor to accelerate project deployment."

About REMOVALL Carbon

REMOVALL Carbon is a developer of certified high-integrity carbon projects, helping companies and organizations meet their climate commitments by enabling them to support, finance, or invest in high-quality carbon initiatives.

A mission-driven company based in France, with offices in Brazil (Rio) and Kenya (Nairobi), REMOVALL Carbon develops and finances ecosystem preservation and regeneration projects that contribute to increasing global carbon sinks and combating climate change. All investments made by REMOVALL Carbon finance projects with significant positive impact on both communities and ecosystems.
